200 Simple Programming Questions

Easy Difficulty • Language-Agnostic (Python, Java, C, C++, JavaScript, PHP, C#)
With Sample Input & Output for Each Question

#	Topic	Questions
1	Basic Variables & Operators	15
2	Conditionals (if-else)	25
3	Loops	40
4	Functions	25
5	String Basics	65
6	Number & Math Basics	30
	Total	**200**

Basic Variables & Operators

Q1. Swap two variables using a temporary variable [Easy]

Input: `a=5, b=10`
Output: `a=10, b=5`

Q2. Swap two variables without using a temporary variable [Easy]

Input: `a=5, b=10`
Output: `a=10, b=5`

Q3. Find the sum, difference, product, and quotient of two numbers [Easy]

Input: `a=10, b=3`
Output: `sum=13, diff=7, product=30, quotient=3.33`

Q4. Find the remainder of two numbers [Easy]

Input: `a=10, b=3`
Output: `1`

Q5. Increment and decrement a variable [Easy]

Input: `a=5`
Output: `incremented=6, decremented=4`

Q6. Print the ASCII value of a character [Easy]

Input: `'A'`
Output: `65`

Q7. Convert a character to its ASCII value and back to a character [Easy]

Input: `'A'`
Output: `65 -> 'A'`

Q8. Demonstrate operator precedence with an expression [Easy]

Input: `2 + 3 * 4`
Output: `14`

Q9. Find the average of three numbers [Easy]

Input: `10, 20, 30`
Output: `20.0`

Q10. Find the square and cube of a number [Easy]

Input: `4`
Output: `square=16, cube=64`

Q11. Check the size (in bytes) of a data type [Easy]

Input: `int`
Output: `4 bytes (may vary by language)`

Q12. Convert a float to an integer [Easy]

Input: `9.8`
Output: `9`

Q13. Convert an integer to a float [Easy]

Input: `9`
Output: `9.0`

Q14. Perform integer division vs float division on two numbers [Easy]

Input: `a=7, b=2`
Output: `int division=3, float division=3.5`

Q15. Demonstrate the modulus operator with different number combinations [Easy]

Input: `10 % 3 and -10 % 3`
Output: `1 and -1 (varies by language)`

Conditionals (if-else)

Q16. Check if a number is positive, negative, or zero [Easy]

Input: `-5`
Output: `"Negative"`

Q17. Check if a number is even or odd [Easy]

Input: `7`
Output: `"Odd"`

Q18. Find the largest of two numbers [Easy]

Input: `10, 20`
Output: `20`

Q19. Find the largest of three numbers [Easy]

Input: `10, 25, 15`
Output: `25`

Q20. Find the smallest of three numbers [Easy]

Input: `10, 25, 15`
Output: `10`

Q21. Check if a number is divisible by both 3 and 5 [Easy]

Input: `15`
Output: `true`

Q22. Check if a character is a vowel or consonant [Easy]

Input: `'e'`
Output: `"Vowel"`

Q23. Check if a given year is a leap year [Easy]

Input: `2024`
Output: `true`

Q24. Build a grade calculator based on marks [Easy]

Input: `85`
Output: `"A"`

Q25. Build a simple calculator (add/subtract/multiply/divide) using if-else [Easy]
Input: `10, 5, '+'`
Output: `15`

Q26. Check if a number is a multiple of another number [Easy]
Input: `20, 4`
Output: `true`

Q27. Check if a character is uppercase or lowercase [Easy]
Input: `'A'`
Output: `"Uppercase"`

Q28. Check if a character is a letter, digit, or special symbol [Easy]
Input: `'5'`
Output: `"Digit"`

Q29. Check eligibility to vote based on age [Easy]
Input: `20`
Output: `"Eligible"`

Q30. Check if a number lies within a given range [Easy]
Input: `15, range=10-20`
Output: `true`

Q31. Determine the quadrant of a point (x, y) [Easy]
Input: `(3, -4)`
Output: `"Quadrant 4"`

Q32. Check if a number is a single-digit or multi-digit number [Easy]
Input: `7`
Output: `"Single-digit"`

Q33. Find the absolute value of a number without using a built-in function [Easy]
Input: `-8`
Output: `8`

Q34. Check if three given angles can form a valid triangle (angle sum = 180) [Easy]
Input: `60, 60, 60`
Output: `true`

Q35. Determine if a given day number (1-7) is a weekday or weekend [Easy]
Input: `6`
Output: `"Weekend"`

Q36. Check if a number is positive and even at the same time [Easy]
Input: `8`
Output: `true`

Q37. Compare two strings for equality [Easy]

Input: `"cat", "cat"`
Output: `true`

Q38. Check if a number is a perfect square [Easy]

Input: `16`
Output: `true`

Q39. Determine BMI category based on an input value [Easy]

Input: `22.5`
Output: `"Normal"`

Q40. Build a traffic light simulator (based on color input, print the action) [Easy]

Input: `"red"`
Output: `"Stop"`

Loops

Q41. Print numbers from 1 to N [Easy]

Input: `5`
Output: `1 2 3 4 5`

Q42. Print numbers from N down to 1 [Easy]

Input: `5`
Output: `5 4 3 2 1`

Q43. Print all even numbers between 1 and N [Easy]

Input: `10`
Output: `2 4 6 8 10`

Q44. Print all odd numbers between 1 and N [Easy]

Input: `10`
Output: `1 3 5 7 9`

Q45. Print the multiplication table of a number [Easy]

Input: `5`
Output: `5 10 15 20 25 30 35 40 45 50`

Q46. Find the sum of numbers from 1 to N [Easy]

Input: `5`
Output: `15`

Q47. Find the sum of the first N even numbers [Easy]

Input: `4`
Output: `20`

Q48. Find the sum of the first N odd numbers [Easy]

Input: `4`
Output: `16`

Q49. Count the number of digits in a number [Easy]

Input: `12345`
Output: `5`

Q50. Find the sum of digits of a number [Easy]

Input: `12345`
Output: `15`

Q51. Find the factorial of a number using a loop [Easy]

Input: `5`
Output: `120`

Q52. Print the Fibonacci series up to N terms using a loop [Easy]

Input: `6`
Output: `0 1 1 2 3 5`

Q53. Check if a number is prime using a loop [Easy]

Input: `17`
Output: `true`

Q54. Reverse a number using a loop [Easy]

Input: `1234`
Output: `4321`

Q55. Check if a number is a palindrome using a loop [Easy]

Input: `121`
Output: `true`

Q56. Print all prime numbers up to N [Easy]

Input: `20`
Output: `2 3 5 7 11 13 17 19`

Q57. Find the product of digits of a number [Easy]

Input: `234`
Output: `24`

Q58. Count the number of even and odd digits in a number [Easy]

Input: `12345`
Output: `even=2, odd=3`

Q59. Find the largest digit in a number [Easy]

Input: `4271`
Output: `7`

Q60. Find the smallest digit in a number [Easy]

Input: `4271`
Output: `1`

Q61. Print numbers divisible by 7 between 1 and N [Easy]

Input: `50`
Output: `7 14 21 28 35 42 49`

Q62. Print a countdown timer from N to 0 [Easy]

Input: `5`
Output: `5 4 3 2 1 0`

Q63. Calculate the sum of squares from 1 to N [Easy]

Input: `3`
Output: `14`

Q64. Calculate the sum of cubes from 1 to N [Easy]

Input: `3`
Output: `36`

Q65. Print all Armstrong numbers between 1 and N [Easy]

Input: `500`
Output: `1 153 370 371 407`

Q66. Print the multiplication tables from 1 to N [Easy]

Input: `3`
Output: `Table of 1, Table of 2, Table of 3`

Q67. Find the GCD of two numbers using a loop [Easy]

Input: `12, 18`
Output: `6`

Q68. Find the LCM of two numbers using a loop [Easy]

Input: `4, 6`
Output: `12`

Q69. Print a number in words, digit by digit [Easy]

Input: `123`
Output: `"One Two Three"`

Q70. Check if a number is a strong number [Easy]

Input: `145`
Output: `true`

Q71. Find the sum of even digits of a number [Easy]

Input: `12345`
Output: `6`

Q72. Find the sum of odd digits of a number [Easy]

Input: `12345`
Output: `9`

Q73. Print the sum of the series 1+2+3+...+N using a while loop [Easy]

Input: `5`
Output: `15`

Q74. Print the sum of the series 1 + 1/2 + 1/3 + ... + 1/N [Easy]
Input: `4`
Output: `2.083`

Q75. Find the number of trailing zeros in a number [Easy]
Input: `1000`
Output: `3`

Q76. Convert a number into its reverse using a while loop [Easy]
Input: `6789`
Output: `9876`

Q77. Print odd numbers in reverse order from N to 1 [Easy]
Input: `10`
Output: `9 7 5 3 1`

Q78. Find the frequency of a specific digit in a number [Easy]
Input: `122333, digit=3`
Output: `3`

Q79. Demonstrate a do-while loop that runs at least once [Easy]
Input: `condition initially false`
Output: `loop body runs exactly once`

Q80. Demonstrate the break and continue statements in a loop [Easy]
Input: `1 to 10, skip 5, stop at 8`
Output: `1 2 3 4 6 7 8`

Functions

Q81. Write a function to add two numbers [Easy]
Input: `3, 4`
Output: `7`

Q82. Write a function to check if a number is even [Easy]
Input: `8`
Output: `true`

Q83. Write a function to calculate factorial [Easy]
Input: `5`
Output: `120`

Q84. Write a function that returns the maximum of two numbers [Easy]
Input: `3, 9`
Output: `9`

Q85. Write a function that returns the minimum of two numbers [Easy]

Input: `3, 9`
Output: `3`

Q86. Write a function with a default parameter value [Easy]

Input: `greet()`
Output: `"Hello, Guest!"`

Q87. Write a function that returns multiple values [Easy]

Input: `10, 3`
Output: `quotient=3, remainder=1`

Q88. Write a recursive function to calculate factorial [Easy]

Input: `5`
Output: `120`

Q89. Write a recursive function to calculate the nth Fibonacci number [Easy]

Input: `6`
Output: `8`

Q90. Write a function to check if a number is prime [Easy]

Input: `13`
Output: `true`

Q91. Write a function to check if a number is a palindrome [Easy]

Input: `121`
Output: `true`

Q92. Write a function to convert Celsius to Kelvin [Easy]

Input: `25`
Output: `298.15`

Q93. Write a function to calculate the power of a number without a built-in function [Easy]

Input: `2, 5`
Output: `32`

Q94. Write a function that takes a variable number of arguments and sums them [Easy]

Input: `1, 2, 3, 4`
Output: `10`

Q95. Write a function to swap two numbers [Easy]

Input: `5, 10`
Output: `10, 5`

Q96. Write a void function that just prints a message [Easy]

Input: `call greet()`
Output: `"Hello!"`

Q97. Demonstrate a function with a return value vs a function with no return value [Easy]

Input: `add(2,3)`
Output: `5 (vs void prints nothing)`

Q98. Write a function that calls another function [Easy]

Input: `5`
Output: `square then double = 50`

Q99. Demonstrate function overloading (same name, different parameters) [Easy]

Input: `add(2,3) and add(2,3,4)`
Output: `5 and 9`

Q100. Write a recursive function to find the sum of digits of a number [Easy]

Input: `1234`
Output: `10`

Q101. Write a function to check if a number is an Armstrong number [Easy]

Input: `153`
Output: `true`

Q102. Write a function to reverse a number [Easy]

Input: `1234`
Output: `4321`

Q103. Write a function to find the GCD of two numbers [Easy]

Input: `12, 18`
Output: `6`

Q104. Write a function to find the LCM of two numbers [Easy]

Input: `4, 6`
Output: `12`

Q105. Write a lambda/anonymous function to add two numbers [Easy]

Input: `3, 4`
Output: `7`

String Basics

Q106. Find the length of a string [Easy]

Input: `"hello"`
Output: `5`

Q107. Concatenate two strings [Easy]

Input: `"Hello", "World"`
Output: `"HelloWorld"`

Q108. Convert a string to uppercase [Easy]

Input: `"hello"`
Output: `"HELLO"`

Q109. Convert a string to lowercase [Easy]

Input: `"HELLO"`
Output: `"hello"`

Q110. Count the number of vowels in a string [Easy]

Input: `"programming"`
Output: `3`

Q111. Check if a string is empty [Easy]

Input: `""`
Output: `true`

Q112. Repeat a string N times [Easy]

Input: `"ab", 3`
Output: `"ababab"`

Q113. Compare two strings character by character [Easy]

Input: `"cat", "cat"`
Output: `true`

Q114. Access an individual character of a string by index [Easy]

Input: `"hello", index=1`
Output: `"e"`

Q115. Find the position of a character within a string [Easy]

Input: `"hello", 'l'`
Output: `2`

Q116. Trim leading and trailing spaces from a string [Easy]

Input: `" hi "`
Output: `"hi"`

Q117. Replace a character in a string with another character [Easy]

Input: `"hello", 'l'->'L'`
Output: `"heLLo"`

Q118. Check if a string starts with a specific substring [Easy]

Input: `"hello world", "hello"`
Output: `true`

Q119. Check if a string ends with a specific substring [Easy]

Input: `"hello world", "world"`
Output: `true`

Q120. Split a string into words based on a space [Easy]

Input: `"the sky is blue"`
Output: `["the","sky","is","blue"]`

Q121. Join a list of words into a single string [Easy]

Input: `["the","sky","is","blue"]`
Output: `"the sky is blue"`

Q122. Count the number of characters in a string excluding spaces [Easy]

Input: `"hi there"`
Output: `7`

Q123. Check if a string contains only alphabets [Easy]

Input: `"hello"`
Output: `true`

Q124. Check if a string contains only numbers [Easy]

Input: `"12345"`
Output: `true`

Q125. Convert the first letter of a string to uppercase [Easy]

Input: `"hello"`
Output: `"Hello"`

Q126. Swap the first and last character of a string [Easy]

Input: `"hello"`
Output: `"oellh"`

Q127. Count how many times a specific character appears in a string [Easy]

Input: `"banana", 'a'`
Output: `3`

Q128. Check if two strings have the same length [Easy]

Input: `"cat", "dog"`
Output: `true`

Q129. Print each character of a string on a new line [Easy]

Input: `"abc"`
Output: `"a" / "b" / "c"`

Q130. Convert a string into a list/array of characters [Easy]

Input: `"abc"`
Output: `['a', 'b', 'c']`

Q131. Concatenate three strings together [Easy]

Input: `"Good", "Morning", "!"`
Output: `"GoodMorning!"`

Q132. Compare two strings for equality without using a built-in comparison operator [Easy]

Input: `"abc", "abc"`
Output: `true`

Q133. Find the number of words in a string separated by spaces [Easy]

Input: `"the sky is blue"`
Output: `4`

Q134. Extract a substring using a given start and end index [Easy]

Input: `"hello world", start=0, end=5`
Output: `"hello"`

Q135. Check if a string is a single word (contains no spaces) [Easy]

Input: `"hello"`
Output: `true`

Q136. Convert a string into its character array and back into a string [Easy]

Input: `"test"`
Output: `['t','e','s','t'] -> "test"`

Q137. Insert a substring at a given position in a string [Easy]

Input: `"hello", insert "XYZ" at index 2`
Output: `"heXYZllo"`

Q138. Remove a specific character from a string [Easy]

Input: `"hello", remove 'l'`
Output: `"heo"`

Q139. Remove all whitespace characters from a string [Easy]

Input: `"h e l l o"`
Output: `"hello"`

Q140. Reverse a string using a built-in function or method [Easy]

Input: `"hello"`
Output: `"olleh"`

Q141. Check if a string is numeric using built-in checks [Easy]

Input: `"12345"`
Output: `true`

Q142. Convert a string into title case using built-in methods [Easy]

Input: `"the great gatsby"`
Output: `"The Great Gatsby"`

Q143. Find the first character of a string [Easy]

Input: `"hello"`
Output: `"h"`

Q144. Find the last character of a string [Easy]

Input: `"hello"`
Output: `"o"`

Q145. Convert a multi-line string into a single line [Easy]

Input: `"hello" + newline + "world"`
Output: `"hello world"`

Q146. Check if a string contains a specific substring [Easy]

Input: `"hello world", "wor"`
Output: `true`

Q147. Count how many uppercase letters are in a string [Easy]

Input: `"Hello World"`
Output: `2`

Q148. Count how many lowercase letters are in a string [Easy]

Input: `"Hello World"`
Output: `8`

Q149. Convert a comma-separated string into a list of items [Easy]

Input: `"a,b,c"`
Output: `["a","b","c"]`

Q150. Convert a list of items into a comma-separated string [Easy]

Input: `["a","b","c"]`
Output: `"a,b,c"`

Q151. Find the index of the last occurrence of a character [Easy]

Input: `"banana", 'a'`
Output: `5`

Q152. Check if a string is equal to its reverse using a built-in reverse method [Easy]

Input: `"level"`
Output: `true`

Q153. Print a string N times separated by a comma [Easy]

Input: `"hi", 3`
Output: `"hi,hi,hi"`

Q154. Format a string using placeholders/variables (string interpolation) [Easy]

Input: `name="Sam", age=25`
Output: `"Sam is 25 years old"`

Q155. Remove the first and last character of a string [Easy]

Input: `"hello"`
Output: `"ell"`

Q156. Check if two strings are equal ignoring case [Easy]

Input: `"Hello", "hello"`
Output: `true`

Q157. Find the total number of special characters in a string [Easy]

Input: `"hi! how @are you?"`
Output: `3`

Q158. Convert tabs in a string into spaces [Easy]

Input: `"hi" + tab + "there"`
Output: `"hi there"`

Q159. Check if a string ends with a punctuation mark [Easy]
Input: `"hello!"`
Output: `true`

Q160. Print a string with each word separated by a hyphen instead of a space [Easy]
Input: `"the sky is blue"`
Output: `"the-sky-is-blue"`

Q161. Check if a string has balanced spacing (no double spaces) [Easy]
Input: `"hi there"`
Output: `false`

Q162. Find the middle character of a string [Easy]
Input: `"hello"`
Output: `"l"`

Q163. Convert a string to lowercase and count how many characters changed [Easy]
Input: `"HeLLo"`
Output: `"hello", changes=3`

Q164. Check if a string is a valid identifier/variable name format [Easy]
Input: `"_myVar1"`
Output: `true`

Q165. Print a string in reverse word order using built-in split/join methods [Easy]
Input: `"the sky is blue"`
Output: `"blue is sky the"`

Q166. Concatenate a string with a number (type casting inside concatenation) [Easy]
Input: `"Score: ", 95`
Output: `"Score: 95"`

Q167. Find the total number of digits present in a string [Easy]
Input: `"abc123xyz45"`
Output: `5`

Q168. Print a string surrounded by a border of symbols [Easy]
Input: `"hi"`
Output: `"******" / "*hi*" / "******"`

Q169. Check whether a string is entirely uppercase [Easy]
Input: `"HELLO"`
Output: `true`

Q170. Check whether a string is entirely lowercase [Easy]
Input: `"hello"`
Output: `true`

Number & Math Basics

Q171. Check if a number is a prime number [Easy]

Input: `17`
Output: `true`

Q172. Find the factorial of a number [Easy]

Input: `5`
Output: `120`

Q173. Check if a number is an Armstrong number [Easy]

Input: `153`
Output: `true`

Q174. Find the GCD of two numbers [Easy]

Input: `12, 18`
Output: `6`

Q175. Find the LCM of two numbers [Easy]

Input: `4, 6`
Output: `12`

Q176. Check if a number is a palindrome [Easy]

Input: `121`
Output: `true`

Q177. Reverse the digits of a number [Easy]

Input: `1234`
Output: `4321`

Q178. Find the sum of digits of a number [Easy]

Input: `12345`
Output: `15`

Q179. Check if a number is a perfect number [Easy]

Input: `28`
Output: `true`

Q180. Generate the Fibonacci series up to N terms [Easy]

Input: `6`
Output: `[0, 1, 1, 2, 3, 5]`

Q181. Check if a given year is a leap year [Easy]

Input: `2024`
Output: `true`

Q182. Find the power of a number (x^n) without using a built-in function [Easy]

Input: `2, 10`
Output: `1024`

Q183. Convert a decimal number to binary [Easy]

Input: `10`
Output: `"1010"`

Q184. Convert a binary number to decimal [Easy]

Input: `"1010"`
Output: `10`

Q185. Convert a decimal number to octal [Easy]

Input: `8`
Output: `"10"`

Q186. Convert a decimal number to hexadecimal [Easy]

Input: `255`
Output: `"FF"`

Q187. Check if two numbers are co-prime [Easy]

Input: `8, 15`
Output: `true`

Q188. Find the sum of the first N natural numbers [Easy]

Input: `10`
Output: `55`

Q189. Check if a number is a strong number [Easy]

Input: `145`
Output: `true`

Q190. Check if a number is a Harshad (Niven) number [Easy]

Input: `18`
Output: `true`

Q191. Round a floating-point number to two decimal places [Easy]

Input: `3.14159`
Output: `3.14`

Q192. Find the floor and ceiling of a floating-point number [Easy]

Input: `4.3`
Output: `floor=4, ceiling=5`

Q193. Generate a random number within a given range [Easy]

Input: `1 to 10`
Output: `e.g. 7 (varies each run)`

Q194. Find the greatest common divisor using the Euclidean algorithm [Easy]

Input: `48, 18`
Output: `6`

Q195. Calculate the simple percentage between two values [Easy]

Input: `50, 200`
Output: `25%`

Q196. Find the number of digits in the factorial of a number [Easy]

Input: `10`
Output: `7`

Q197. Check if a number is divisible by all digits it contains [Easy]

Input: `128`
Output: `true`

Q198. Find the sum of the first N prime numbers [Easy]

Input: `5`
Output: `28`

Q199. Check whether a number is a Duck number (contains a 0 but does not start with one) [Easy]

Input: `3025`
Output: `true`

Q200. Find the number of even and odd numbers between 1 and N [Easy]

Input: `10`
Output: `even=5, odd=5`
